<b>Funding Period:</b>	June – August, 2018
<b>Project Coordinator:</b>	Michelle Tolar, Lincoln Parish Development Director
<b>Project Administration:</b>	United Way: <i>Boys &amp; Girls Clubs of North Central LA</i>
<b>Total Funding Requested:</b>	\$ 15,000.00

---

## **Program Summary**

The purpose of the grant is to assist the Boys & Girls Club in expanding its summer feeding program to provide meals at 10 sites during the summer. Any child age 0-18 is eligible to receive a meal at any site where meals are served. Meals served are based on a 5-day planning menu, prepared in advance and based on healthy meal choices.

The Summer Feeding Program is partially funded through a reimbursable grant from the State of Louisiana, which covers only the cost of the meals and a small administrative allowance. Since 2015, with the aid of \$15,000 in funding from the Foundation, the Boys & Girls Club has been able to expand its meal services by two weeks and serve an additional 15,018 meals. No fees are charged by the facilities where meals are distributed, and most sites are housed in neighborhoods where children are within walking distance of the feeding site. All food is prepared, cooked, and packaged at the Boys & Girls Club kitchen every morning. A representative from each site comes to the Club and picks up the food to transport back to their facility one hour before serving.

## **Funding Objectives**

Funding by the Foundation for the 2018 summer feeding program will, as in prior years, facilitate the following:

- Additional kitchen equipment (utensils and storage containers to transport food)
- Hire additional cooking / serving staff in Grambling
- Extend the program an additional two weeks, for a total of ten weeks, at ten feeding sites
